

JINAD STEFAN

Software developer

Details

- +2347068188669
- jinadbstefan@gmail.com
- Lagos, Nigeria

Skills

- React.js
- JavaScript
- Typescript
- Tailwind CSS
- Full=Stack Development
- API Integration
- Code optimization
- Test Automation
- Version control

SUMMARY

Software Developer with strong practical experience in building modern, responsive, and performance-driven web applications using React, JavaScript, TypeScript, and Tailwind CSS. Adept at translating complex UI/UX designs into clean, maintainable code, collaborating with cross-functional teams, and delivering interfaces that support real-world business objectives. Self-motivated, disciplined, and continuously improving, with a strong sense of professional responsibility and ownership.

PROFESSIONAL EXPERIENCE

Lead Front-End Developer

Omoze Nursing Educator (ONE), Lagos, Nigeria. • Jul 2023 - Oct 2023

- Architected and implemented reusable React components to ensure scalability and consistency across the application. Converted complex Figma and design-system specifications into pixel-accurate, accessible user interfaces.
- Collaborated daily with UI/UX designers to refine user experience decisions and ensure technical feasibility. Integrated frontend components with backend APIs, ensuring smooth data flow and reliable application behavior.
- Maintained clean Git workflows, reviewed code, and enforced frontend best practices.

Personal Fitness Trainer

Babcock University, Ilisan, Ogun, Nigeria. • Mar 2022 - Mar 2025

- Develop and implement exercise programs that prioritize the specific goals and aspirations of a diverse clientele.
- Differentiate program modifications for special populations required for varying client abilities and safety.
- Demonstrate essential communication skills and techniques required to connect, motivate, and inspire clients.
- Increased participation and retention through engagement strategies.
- Boosted revenue from 500–700k monthly to over 1.9M+ .

EDUCATION

Specilization

Web3Schools, Online Professional Training

My technical education has been deliberately focused on modern frontend technologies that dominate today's production environments. I specialized in JavaScript and TypeScript due to their central role in building scalable, maintainable web applications, and in React because of its industry-wide adoption for creating high-performance, component-based user interfaces. In addition to structured online learning, I am largely self-taught, having reinforced formal lessons with extensive independent study, hands-on projects, and real-world application.
