Professional Summary

Frontend Developer with strong practical experience in building modern, responsive, and performance-driven web applications using React, JavaScript, TypeScript, and Tailwind CSS. Adept at translating complex UI/UX designs into clean, maintainable code, collaborating with cross-functional teams, and delivering interfaces that support real-world business objectives. Self-motivated, disciplined, and continuously improving, with a strong sense of professional responsibility and ownership.

Professional Experience

Lead Frontend Developer

OMOZE's Nursing Educators (ONE) — Lagos, Nigeria

(Project currently on hold)

- Architected and implemented reusable React components to ensure scalability and consistency across the application.
- Converted complex Figma and design-system specifications into pixel-accurate, accessible user interfaces.
- Collaborated daily with UI/UX designers to refine user experience decisions and ensure technical feasibility.
- Integrated frontend components with backend APIs, ensuring smooth data flow and reliable application behavior.
- Maintained clean Git workflows, reviewed code, and enforced frontend best practices.

Education

Web3Schools (Online Professional Training)

Specialization: JavaScript, TypeScript, React

My technical education has been deliberately focused on modern frontend technologies that dominate today's production environments. I specialized in JavaScript and TypeScript due to their central role in building scalable, maintainable web applications, and in React because of its industry-wide adoption for creating high-performance, component-based user interfaces. In addition to structured online learning, I am largely self-taught, having reinforced formal lessons with extensive independent study, hands-on projects, and real-world application.
